## EXPERIENCE

### Blockchain Developer Intern - Wakam [Remote]

February 2021 - August 2021

Paris, France

Worked on proof of concepts, prototypes and internal tools

- Wrote smart contracts based on ERC1155 and unit tests with Chai.js
- Developed a Typescript library to interact with Tezos FA1.2 and FA2 standards

Technologies: Solidity, Typescript, C#, Docker, Ligo

### Backend Engineer - Sopra Banking Software [Remote]

October 2020 - January 2021

Paris, France

Developed a collocation platform on a Hyperledger Besu blockchain

- Designed the blockchain architecture, smart contracts and server
- Wrote the backend in Node.js and smart contracts around ERC20/ERC721

Technologies: Besu, Solidity, Node.js, Express, Mongo, Docker

### Blockchain Developer Freelance - Wakam [Remote]

March 2020 - December 2020

Paris, France

Developed solutions of optimization and auditability for our private blockchain

- Added a private keys management system to our blockchain library
- Developed a fullstack auditability tool for our partners
- Built a prototype on Tezos

Technologies: Quorum, Azure, C#, React, Node.js, Solidity, Docker, Ligo

### Full Stack Developer Intern - Wakam

October 2019 - March 2020

Paris, France

Implemented a tool to prove the authenticity of our private blockchain

- Built the authenticity tool with React, Node.js and C#
- Helped to write our blockchain library in C#
- Developed a fullstack application to pair connected objects by webcam

Technologies: Azure, C#, React, Node.js, Express, SQL, CosmosDB

## EDUCATION

### ESILV

2017 - 2021

Paris, France

Master in Financial Engineering – Fintech

Blockchain Programming (Solidity), Lightning Network, OOP (C#, C++), Data Structure (C), NoSQL (MongoDB, Apache Kafka)

### University of French Polynesia

2014 - 2017

Papeete, Tahiti

Three-year University Degree in Mathematics

## SKILLS

### Programming Languages

Solidity, Javascript (ES6+), Typescript  
Python, C#, HTML/CSS

### Libraries & Frameworks

React, Next.js, Node.js, Express, Mongo,  
Hardhat, Truffle

### Tools & Platforms

Git, Netlify, Firebase, Docker, Geth

### Soft skills

Autonomous, Patient, Optimistic, Proactive

## PROJECTS

### Twitter Clone (In progress) - [Link](#)

Building a fullstack application with Next.js and Firebase

### Schedular Multisig - [Link](#)

Upgradeable contract behind a Multisig contract
